## Virtual or In-Person Interviews for the 2022-2023 Residency Recruitment Cycle?

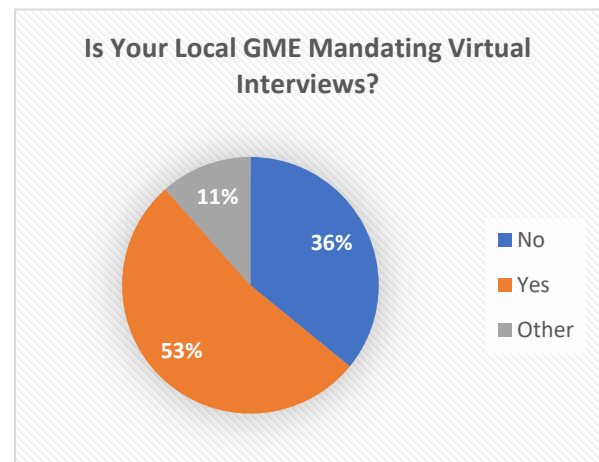

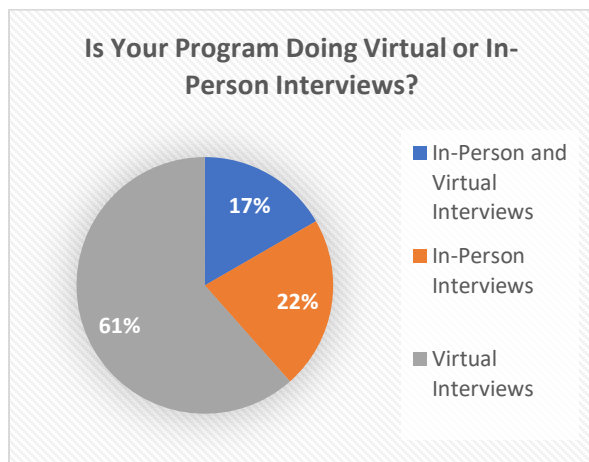

### POLL RESPONSES FROM CORD MEMBER RESIDENCY PROGRAMS

September 2, 2022

The American Orthopaedic Association's CORD/Academics Committee leadership distributed a two-question poll to all CORD-member orthopaedic surgery residency programs on August 26, 2022.

- Of the 191 CORD program directors to whom the poll was sent, 41% responded.

Below is a summary of the results.

- The majority of programs that indicated they are doing Virtual and In-Person Interviews commented that they are hosting virtual for rotators and in person interviews for non-rotators.
- Others commented that they were planning to host in-person interviews but were required by institutional GME to offer some virtual interviews.

**NOTE:** All CORD-member programs should update their [Orthopaedic Residency Information Network \(ORIN\)](#)<sup>™</sup> profile with specific details about their plans for interviews, which can be viewed on the "Current Season" tab.

Please see [AOA/CORD's Recommended Guidelines for the 2022-2023 Residency Application](#) on the AOA website. Contact [cord@aoassn.org](mailto:cord@aoassn.org) with questions.
