Eric R. Henderson – MD, FAAOS, FAOA

Biographical Statement:

Dr. Henderson is an Associate Professor of orthopaedic oncology at Dartmouth College. Dr. Henderson's research primarily involves improving the safety and efficacy of surgery for patients requiring complex limb salvage operations for cancer. In 2011 Dr. Henderson first-authored the world's largest-to-date series of limb salvage surgeries, resulting in a failure classification system that has since been adopted by the International Society of Limb Salvage. Dr. Henderson is an adjunct faculty member at the Thayer School of Engineering at Dartmouth College, where he works to improve surgical safety and efficacy through advanced optical navigation; this work is currently funded by the NIH. Dr. Henderson has published over 100 scientific manuscripts and holds 15 medical device patents.
