

Dr. Kristoff Reid earned his bachelor of science degree from the United States Military Academy, West Point, and, following 5 years as an infantry officer in the 82<sup>nd</sup> Airborne Division, his medical doctorate from Washington University in St. Louis School of Medicine. After residency at The Johns Hopkins Hospital, he underwent fellowship training in Orthopaedic Trauma at Duke before taking a job at the Medical University of South Carolina (MUSC), where he remains today. While working at MUSC, Dr. Reid continued his service in the U.S. Army reserves, deploying as a surgeon to Afghanistan, Syria, and Iraq and commanding a Field Hospital and a Medical Support Unit. He is active in AO North America, the Southeastern Fracture Consortium, and other professional organizations. His current research interests are assessment of the quality and limitations of the orthopaedic literature and expanding the reach of MUSC's trauma research through involvement in multicenter trials.
