

Moe R. Lim, MD

I've been on faculty at the University of North Carolina School of Medicine since finishing my training in 2005.

As Clinical Professor of Orthopaedics at the UNC School of Medicine, my practice focuses on degenerative spinal disorders, with a special interest in the cervical spine. In addition to mentoring UNC medical students and residents, I also mentor and work with MHA/MPH students at the UNC Gillings School of Public Health. I also serve our Department as Division Chief of Adult Spine Surgery.

As Associate Chief Medical Officer of Surgical Services at UNC Hospitals, my administrative duties include medical directorship and operational oversight of our 58 operating rooms across 5 sites on 2 campuses.
