

Kyle Schweser, MD, FAOA

I am an Associate Professor in the Department of Orthopaedics at the University of Missouri. I am a member of the trauma division and the director of the foot and ankle division. I specialize in orthopaedic trauma care and foot and ankle reconstruction. I have a specific research interest in infection, foot and ankle reconstruction, and outcomes following trauma surgery. I have been honored to receive several research awards including the Basic Science Chairmans Award at the 2023 Orthopaedic Trauma Association annual meeting, and the Gold Medal recipient for the AO Research Olympiad in Davos, Switzerland in 2023. I am on several committees between AAOS, AO, and OTA and enjoy contributing the education of future orthopaedic surgeons. In my free time, I enjoy spending time with my wife and 5 children. We manage a small farm and train horses when we aren't working or attending our kids' sporting events.
