

Lisa Ercolano, MD

I am originally from Providence, Rhode Island. At Vassar College, I obtained my degree in biopsychology with a correlate sequence in chemistry. I worked in biotechnology for 2 years before entering medical school at University of California, Davis. After four fantastic years there, I matched to the University of Pittsburgh Medical Center Department of Orthopaedics Residency Program. There I honed my skills in orthopaedics and realized my love for the oncology subspecialty. My fellowship in oncology at the Massachusetts General Hospital/Harvard Combined Program provided an excellent experience and training which culminated in my return to Pittsburgh to start an orthopaedic oncology division at Allegheny Health Network. Now, over ten years into that process, we have a thriving, well rounded multi-disciplinary orthopaedic oncologic service taking care of benign and malignant conditions. I also serve as an assistant program director for our 5 resident/year residency program as well as the orthopaedic department's DEI representative. I am active within the Musculoskeletal Tumor Society (MSTS) having served on multiple committees and currently as an at-large member of the executive committee.
