

Danielle Wilbur, MD is an orthopaedic surgeon who specializes in hand and wrist surgery, with a particular interest in Dupuytren's disease of the hand. She completed her undergraduate studies at SUNY at Buffalo, where she studied biotechnology, forensics and biochemical pharmacology. She received her medical school training at SUNY Upstate Medical University in Syracuse, NY before completing her residency in orthopaedic surgery at George Washington University in Washington, DC. Following residency, Dr. Wilbur attended the Philadelphia Hand Center at Thomas Jefferson University for her hand and upper extremity fellowship.

Dr. Wilbur is currently an Associate Professor in the Department of Orthopaedics and Physical Performance at the University of Rochester in Rochester, NY. She has joint appointment as an Associate Professor of Surgery-Plastic Surgery. She is the former Associate Program Director of the Orthopaedic Residency Program, and is currently the Division Chief of Hand and Wrist Surgery.
