Dr. Chris Hardesty was raised near Sacramento, California and obtained her undergraduate degree in Biology and Math at Hendrix College. She attended medical school and completed an orthopaedic surgery residency at the University of Arkansas for Medical Sciences. She completed a fellowship in Pediatric Orthopaedic Surgery at UH Rainbow Babies & Children's Hospital and a secondary fellowship in Neuromuscular Orthopaedic Surgery at A.I. DuPont Hospital for Children (Nemours). Dr. Hardesty's clinical interests include pediatric spine deformity (such as scoliosis), baclofen pumps, cerebral palsy, spina bifida, spinal muscular atrophy, and other neuromuscular disorders. She is currently the program director of the Orthopaedic Surgery Residency for University Hospitals and Case Western Reserve University. She was recently appointed an Associate Editor of JBJS following three years as the lead writer for the "What's New in Pediatric Orthopaedics" feature. She is a leader in the Pediatric Spine Study Group, chair of the Education Resource Committee of the Scoliosis Research Society, on the Board of Directors of the Spasticity Treatment and Research Society, and past board president of Youth Challenge in Cleveland. In her spare time, she is an Orangetheory addict, bakes a lot, and sometimes flies airplanes. She and her husband, Dustin, have 2 boys (Jack, 13 and Henry, 10) and one feisty dog (Hank). They keep her on her toes.
