Dr. Jeffrey K. Lange, MD, is Director of Arthroplasty at Brigham and Women's Hospital in the Division of Arthroplasty at Mass General Brigham. He is Assistant Professor at Harvard Medical School. He specializes in the management of hip and knee arthritis, with a special focus on complex primary arthroplasty, revision arthroplasty, and hip-spine syndrome. He is faculty of both the Harvard Combined Orthopedic Residency Program and the Brigham and Women's Hospital Arthroplasty Fellowship Program since 2016. His research interests include the effect of hip-spine syndrome on outcomes following total hip replacement and factors associated with differential patient outcomes following joint replacement.

Dr. Lange graduated from Princeton University in 2004 with an A.B. in Computer Science. He graduated from University of Massachusetts Medical School in 2009, from University of Massachusetts Medical Center Orthopedic Surgery Residency Program in 2015, and from Hospital for Special Surgery Adult Reconstruction and Joint Replacement Fellowship in 2016.
