Scott Tintle, is an orthopaedic hand and microsurgeon who will join the University of Pennsylvania this fall as an Orthopaedic Hand Surgeon, He retires from the United States Navy this year after 24 years of distinguished service. He has most recently served as Chief of Hand Surgery Service, Hand Surgery Fellowship Director, and the Director of the Limb Optimization and Osseointegration Program at Walter Reed National Military Medical center. He has been deployed to and served as the Chief Orthopaedic Surgeon in Kandahar, Afghanistan. He is a fellowship-trained hand and microsurgeon with a research interest in fragility fractures and osteoporosis. He is sustained and inspired by his wife Patti and their three children — Haley (20), Graham (17), and Morgan (14) — whose unwavering support has made his service, scholarship, and this next chapter possible.
