Dr. Ryan Voskuil, MD, FAOA, FAAOS is an orthopaedic oncologist at the Levine Cancer Institute and Associate Professor of Orthopaedic Surgery at Wake Forest University School of Medicine. He specializes in the treatment of musculoskeletal tumors, metastatic bone disease, and complex limb-salvage reconstruction. Ryan earned his undergraduate degree in Biology from Erskine College, attended medical school at the Medical University of South Carolina, completed his orthopaedic surgery residency at the University of Tennessee College of Medicine in Chattanooga, and pursued fellowship training in Adult and Pediatric Musculoskeletal Oncology at The Ohio State University and Nationwide Children's Hospital.

Throughout his career, he has been passionate about building programs, mentoring trainees, and caring for patients facing some of medicine's most challenging diagnoses. He founded the first musculoskeletal surgical oncology program in his region, has authored numerous scientific publications and textbook chapters, and has been recognized for his leadership, teaching, and contributions to orthopaedic oncology.

While Ryan loves the operating room, his greatest priorities are his faith and his family. He is happiest when spending time with his wife, Barron, and 4 children, cheering from the sidelines of their activities, or enjoying the simple moments that come with family life. Friends and colleagues know him as someone who values relationships, mentorship, and community as much as professional achievement.

A former college basketball and soccer athlete, lifelong teacher, mentor, and occasional church musician, Ryan still enjoys finding opportunities to connect with and serve others. Whether he is helping a patient navigate a cancer diagnosis, teaching residents, speaking at a conference, or spending time with family, he strives to approach each role with compassion, humility, and a sense of purpose.
